

Be A **Safety** Star

It takes all nurses, physicians, and staff working together to achieve and maintain a safe workplace.

- Practice the culture of safety error prevention techniques
- Do not block fire equipment or paths of egress
- Practice good housekeeping
- Keep sharps containers secure at all times
- Use the correct chemical for the correct purpose according to manufacturer and department guidelines.
- Training, learn the right way to do your job. Ask a supervisor for direction if unsure about a process or procedure.
- Never lift anything too heavy or bulky. Get help! Practice correct lifting technique.
- PPE, always wear the appropriate personal protective equipment (PPE) for the task!
- Never disconnect a piece of equipment by pulling on the electrical cord.
